EMPLOYMENT

Cory J Durso Tree Service

All throughout my childhood until age 16 I worked for my dad at his company where I picked up branches, moved logs, raked leaves and twigs that fell from the job, and ran a leaf blower for that final touch at the end of cleanup.

Burger King

Team Member, Cleanup Crew

I worked at Burger King for three years, from age 16 to 19. There I worked as part of the regular crew, assembling sandwiches, taking orders, assembling orders, and running the register. I also did cleanup crew, where one person stays after closing to clean the kitchen, the broiler, and the fryer, as well as the exhaust system for the broiler.

Comfort Inn

Housekeeper

As a housekeeper at the comfort inn I cleaned rooms, public spaces, and catered to the needs of guests. When needed, I also washed and folded laundry, served breakfast, and cleaned the outside grounds. I worked here for four years, from age 17 to 21.

EDUCATION

I am self taught and have been studying full-time since October of 2020. The most advantageous way of studying that I have come across, and the direction I have gone is to read about the topic and take notes along the way, using my own words. Also when following a tutorial, I've always gone back and re-built it in my own way. The learning media I've used include [FreeCodeCamp](#), YouTube, W3Schools, StackOverflow, [Head First JavaScript](#), and various other online resources. While I have an excellent understanding of HTML and CSS, I have a special interest in JavaScript. I've been trying to advance my knowledge of it as much as possible while building projects along the way and reinforcing my foundational understanding of the language and its principles.

SKILLS

HTML5
CSS
JavaScript
APIs
XML
Git
GitHub

PROJECTS

[CodePen](#)

Some of my projects can be seen on my CodePen account. These ones are mostly quite bland little projects that I did just to demonstrate functionality.

[GitHub](#)

Most of my projects can be seen on my github. I've been adding to it every day. My most recent and ongoing project has been a mechanic website. It's been an awesome experience so far, and has really showcased my CSS skills.
